## Summary

During my studies in Information Systems, I developed a strong foundation in software development and the application of information technology to business needs. I gained experience with JavaScript, HTML, CSS, databases, and web development, as well as exploring the use of AI and AI agents.

As part of my academic project, I developed an e-commerce website for heavy equipment spare parts using TypeScript and SQLite, applying information systems concepts and business processes throughout the application development process.

## Skills

- Web Development: HTML, CSS, JavaScript, TypeScript, React.js
- Database: MySQL, SQLite
